

Marketing Audit & Plan

Client	XXXXXXXXXX – XXXXXXXXXX
Location targeted	England
Language	English (UK)
Accounts checked	Google Ads (XXXXXXXXXX), Google Analytics 4, live website
Prepared by	Digital Marketing Remote
Date	19 September 2026

01 Overview

XXXXXXXXXX is a small-scale commercial cleaning and facilities management company. It offers cleaning services in offices, commercial schools, universities and other accommodation, health care, and off-site services such as other facilities. After cleaning, services include waste collection and disposal, site security, guarding and building maintenance. It began with business and construction, and now also provides support to more than 100 clients, as the expansion of the advertising in the area of each general company. The audit covers Google Ads and the website for 12 pages only. The 1200 visitors campaign on the same account and the overall advertising were reported, not audited.

04 Marketing plan & recommendations

Where the budget should go — and where it shouldn't

Service	Spend here?	Why
Conversion optimisation	Main focus	The conversion rate is the single most important metric for success
Other website optimisation	Yes	Improving the website will increase the number of leads generated
Content marketing (blogs, infographics)	Yes	Long-term content marketing strategy will build brand equity
Search engine optimisation	Test	Search engines are the primary source of traffic, but results are often slow
Display advertising (banners)	Inside the main campaigns	Display ads can be used to promote offers, but they are often expensive
Video advertising (YouTube, etc.)	Not now	Video ads are the most effective for brand awareness

What we'll do

1. Fix the tracking first: [Google Analytics](#) + [Google Tag Manager](#) + [Facebook Pixel](#) + [LinkedIn Insight Tag](#) + [Twitter Conversion API](#) + [Salesforce Marketing Cloud](#)
2. Separate goals for forms and phone calls [Using Google Analytics to track phone calls](#)
3. One campaign per service [How to set up a Google Ads campaign for a single service](#)
4. Switch off AI Max and automatic landing pages [How to turn off AI Max and automatic landing pages](#)
5. New negative keyword lists built by us [How to build a negative keyword list](#)
6. A brand campaign [How to set up a brand campaign in Google Ads](#)
7. Cover England [How to target a specific region in Google Ads](#)

Needed from [Marketing](#)'s side: [Marketing](#) will be responsible for creating content, writing copy, and managing the campaign. [Sales](#) will be responsible for tracking leads and converting them into customers. [IT](#) will be responsible for ensuring the website is working properly and that the tracking code is installed correctly.

Budget

We will require an initial budget of £5,000 per month, with a further £5,000 for the first three months to cover the initial setup and testing phase.
